Project Design Phase-II

Customer Journey Map – Car Rental Request Automation

Date: 11 October 2026
Project Name: Car Rental Request Automation in ServiceNow

This journey map describes the employee experience from identifying the need for a rental car through submission, approval, transport fulfillment and completion.

Stage	Employee Action	Touchpoint	Pain Point	ServiceNow Response	Desired Outcome
1. Need	Employee plans official travel and needs a car.	Travel requirement	Does not know whom to contact or how to request.	Service Catalog provides a single request entry point.	Clear starting point.
2. Submit	Employee enters travel and vehicle details.	Car Rental Request catalog item	Manual forms may miss required details.	Mandatory variables and validation guide the employee.	Complete request submitted.
3. Approval	Employee waits for authorization.	Approval notification	Unclear approval status can cause follow-ups.	Automated approval routing and notifications.	Decision is visible.
4. Assignment	Approved request moves to transport.	RITM / assignment group	Manual forwarding can delay processing.	Approved RITM is routed to Transport team.	Right team receives request.
5. Availability	Transport checks vehicle/rental availability.	RITM fulfillment record	Availability may be uncertain.	Transport records availability and fulfillment details.	Rental arrangement confirmed.
6. Completion	Employee receives final status.	ServiceNow notification/status	Last-minute communication can be difficult.	Completion notification and status tracking.	Employee knows arrangement is complete.
