Ideation Phase

Empathize & Discover

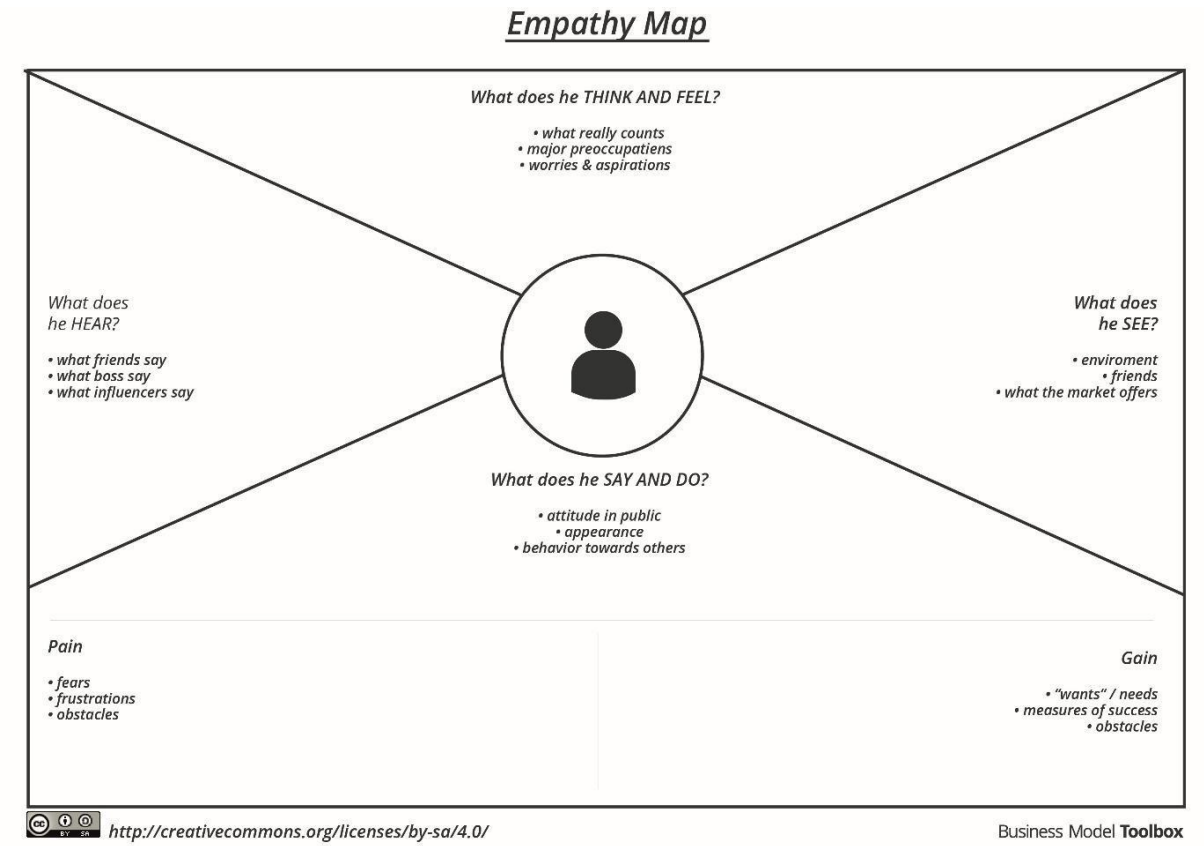

Date	11th October 2026
Team ID	Servicenow - A2
Project Name	Car Rental Request Automation in ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

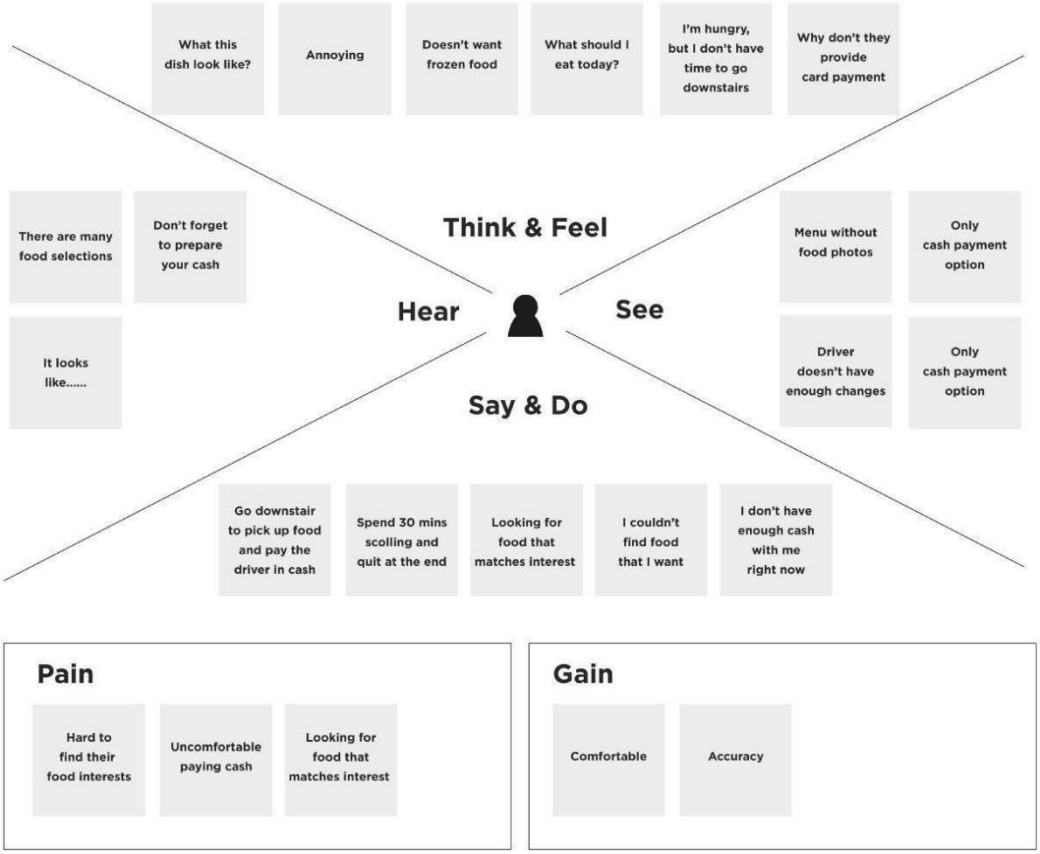

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Food Ordering & Delivery Application

Car Rental Request – Empathy Map

Primary user: Employee requesting a rental car for official travel. The map captures the user's needs, observations, actions and emotions during the request process.

Empathy Area	User Insights
SAYS	"I need a car for my official trip." "I want to know whether my request is approved." "I should not have to repeatedly contact the transport team for updates."
THINKS	"Did I provide all the required details?" "Is the car available for my travel dates?" "Who is processing my request and what is the current status?"
DOES	Submits the ServiceNow catalog request; enters travel dates, pickup/drop-off information and car preference; checks the request/RITM status; responds if additional information is requested.
FEELS	Wants the process to be simple and reliable; may feel anxious when approval or vehicle availability is unclear; feels confident when the request status and

	notifications are clear.
PAINS	Manual emails or calls; repeated follow-ups; incomplete request information; unclear approval status; uncertainty about vehicle availability; risk of last-minute arrangements.
GAINS	One standard ServiceNow form; mandatory and clear

	fields; automated approval; transport-team assignment; timely notifications; transparent RITM tracking; faster and more reliable fulfillment.

Key User Need

The employee needs a simple, transparent and automated car rental request process that confirms what was submitted, shows the approval/fulfillment status and reduces the needfor manual follow up
